 	<p>DIATOMACEOUS EARTH FOOD COMPLEMENT 2 bottles : 4L / 32 Oz</p> <p>Suitable for all animals Mechanical deworming / non chemical</p>	<p>Inactivation of Mycotoxins present in food. Effect intestinal bandage and prevents diarrhea. Action on the microflora of the digestive tract. Regulates digestive transit. Reduction of faecal odours. Anti-inflammatory effect. Contribution of organic silicon and trace elements.</p>
 	<p>POULTRY MULTI-VITAMINS DETOX</p> <p>Maintaining digestive comfort Suitable for all poultry Reduces stress reactions Bottle of 200ml</p>	<p>DETOX Transit & Digestion is designed to help maintain digestive balance and good intestinal transit. Backyard poultry are often subject to internal parasitism (worms) due to their mode of production. food (consumption of grass, soil, ...), which causes intestinal discomfort. Similarly, stress factors or dietary changes can lead to digestive disorders. Vitamin concentrate for the growth and vitality of poultry. Helps the elimination of toxins and the assimilation of feed. Liquid dead yeast, Magnesium chloride, Additives.</p>
 	<p>PONTE</p> <p>With plant extracts Suitable for all poultry Bottle of 200ml</p>	<p>The nutritional supplement "ponte" is a dietary supplement with plant extracts. The egg-laying period is a critical time when the bird's nutritional needs increase. This product is recommended during the breeding period. It contributes to a good preparation of the breeders, and provides support to the metabolism. layers (quantity, average weight and quality of eggs). Recommended to avoid stunted chick growth + ruffled appearance of feathers.</p>
 	<p>POULTRY MULTI-VITAMINS</p> <p>Vitamin concentrate Maintains a balanced diet Suitable for all poultry Reduces stress reactions Bottle of 200ml</p>	<p>Indicated for weaning and critical growth phases. Poultry feed may be deficient in vitamins. This deficiency causes various problems (loss of shape, loss of appetite, plumage abnormalities). Helps recovery during periods of stress (weaning, growth).</p>
 	<p>MULTI-VITAMINS RABBITS</p> <p>Growth and vitality of rabbits Maintains a balanced diet Trace elements : Zinc, Copper Iron Bottle of 200ml</p>	<p>Strengthens growth, vitality, resistance and health of the animal. Recommended for weaning and critical growth phases. Compensates for vitamin deficiencies. Maintains rabbits in good health and recovery during periods of stress (weaning, growth).</p>
 	<p>STOP PICKING / PLUCKING</p> <p>Vitamins + trace elements Maintains the quality of the dander Protects the skin Suitable for all poultry Amino acids, vitamin B3, minerals and trace elements</p>	<p>The nutritional supplement "plumage" is a complementary food designed for skin protection and the quality of the dander. The moulting period requires special attention. The bird must ensure a good plumage and restore its reserves to have a well fertilized egg later and to fight against different physiological and metabolic aggressions. Indicated during the moulting period because it intervenes effectively with its vitamins and trace elements. To be used during critical phases of growth and rearing (moulting period, pecking problems, etc.).</p>
 	<p>BIRD MULTIVITAMINS</p> <p>Vitamin concentrate Maintains a balanced diet Bottle of 200ml</p>	<p>Helps birds to recover during periods of stress (weaning, growth). A vitamin-deficient diet can be the cause of various problems (loss of shape, loss of appetite, plumage anomalies, etc.). Provides the vitamins essential for a balanced diet, and thus contributes to the maintenance of good health of birds.</p>
 	<p>BIRD TONIC</p> <p>Vitamin concentrate Maintains a balanced diet Fortifier with plant extracts Bucket of 1 Kg</p>	<p>Multi-vitamin supplementary feed that is added to the continuous feed. Intended for growth, maintenance of dietary balance. Provides the necessary elements to maintain the birds' biological balance. The presence of vitamins promotes growth and reproduction. Minerals providing a good phosphocalcium ratio and allowing good bone building. Trace elements playing a major role in metabolism and energy yield. Amino acids contribute to the development of proteins and muscle tissue.</p>
